Education

2022 – 2026/2027	🔖 **B.Sc in Digital Systems, University Of Piraeus**
August 2024 – January 2025	🔖 **Eramsus+ Exchange Program in Computer & System Sciences, Stockholm University**

Experience

April 2025 – August 2025	**Feature Engineer** in the research program: **New Data Spaces for Green Mobility**. Contributed to manipulating raw data, extracting meaningful features, and applying machine learning techniques for data analysis and modeling.

Volunteering & Community Involvement

2025 – Present	**Expertise Member** at **Uni.AI**. Involved in organizing AI-related events and reviewing research papers. Support the marketing team by gathering and summarizing information on current AI trends and innovations.
	Member of the **IEEE AI(SG)**. Collaborating on projects involving computer vision and transformer models. Engaged in research discussions, workshops, and applied machine learning initiatives across the IEEE academic community.

Projects

Projects

Todolist Clone – Full-stack task manager built with Flask (backend) and React + Tailwind CSS (frontend). Features secure JWT authentication, task CRUD operations, and project/label organization with a responsive UI.

Skills

Coding	Python, JavaScript, xml/xsl
Data Analysis & Manipulation	Pandas, NumPy, Excel, Scikit-learn , Matplotlib, PowerBI
Frameworks	Flask, FastAPI, PyTorch, Tensorflow
Databases	Mysql, PostegreSql
Tools	Git, Excel , LaTeX

Languages

· **Greek** – Native Language
English – C2 Level
Spanish – B1 Level

Certificates

Football Data Analyst. by **Workearly**
Fundamentals of Deep Learning by **NVIDIA**
Generative AI with Diffusion Models, by **NVIDIA**
